

Grain Moisture Meter

Features:

- Automatic weighing; automatic temperature compensation; automatic moisture measurement; automatic shutdown.
- Water correction for empty machine; new compensation mode; AC and DC dual-purpose.
- Users can calibrate and correct errors by themselves.

Technical Parameter:

Measurement error	$\leq \pm 0.5\%$ (main moisture range)
Repeat error	$\leq 0.2\%$
Measuring range	3~35%
Measuring time	$\leq 10s$
Sampling method	The fixed weight is 150g (except for special samples). If there is no operation for 3 minutes, it will automatically shut down.
Temperature Compensation	Automatic
Operating environment temperature	0~40°C
Net weight	860g
Working power supply	four No. 5 dry batteries

Calibration	floating three-point calibration, unlimited varieties (common varieties have been pre-calibrated and can be directly measured)
Measurement error	≤±0.5% (main moisture range)
Grain Testing units	28 + grains

Grains seeds can be tested:

Species name	Species code	Species name	Species code
Round shaped paddy	P1	Soybean	P2
Wheat	P3	Rapeseed	P4
Maize	P5	Barley	P6
Long shaped paddy	P7	Rice (All kind of Rice)	P8
Soybean meal	P9	Peanut	P10
Coffee bean	P11	Rapeseeds meal	P12
Grain forage	P13	Sunflower seeds	P14
Big watermelon seeds	P15	Small watermelon seeds	P16
Carrot seeds	P17	Black sesame	P18
Yellow sesame	P19	Cotton seeds	P20
Cotton meal	P21	Vegetable seed	P22
